

Communications & Sundries

Note from distributor: Request for new lodgings!

The noise outside my attic has been bordering on distracting for some weeks and I have just discovered the reason. Apparently some kind of bombardment of the city is in progress. If this ridiculous situation continues I shall be forced to move elsewhere in order to get any work done.

Would all of you please send accommodation suggestions to the usual address? I require a reasonably-priced establishment that will not make silly objections to chemicals or moderate numbers of dogs. I will consider any area, even out of the country, but if you wish me to continue producing this journal there will have to be a postal station nearby.

Aguel

A: Thoughturge
D: Response to Pageturner's scurrilous retort to my response to his response to my criticisms of his Observations on the Strata in Stinesmackt Quarry

That title alone might have warned you that this is an exchange better suited to the pages of NLW and not a respectable journal. Stop it.

Tulpie

A: Dendrite
D: Cadabra Alpha 0.2 (Towards a Universal Syntax for Magical Processes)

That heap of ash was my second-best potting shed.

Erck

A: WearingSocks
D: You Said It Couldn't be Done (A Proof of Lachance's Last Theorem)

Brilliant!

Bitterative

A: Nominal
D: Observations upon Toxicity Levels in the Efts of Native and Introduced Newt Species

Dare you to swallow one.

A: Pageturner
D: Response to Pageturner's scurrilous retort to my response to his response to my criticisms of his Observations on the Strata in Stinesmackt Quarry

Not going to let him get away with that, are you?

WearingSocks

A: Dendrite
D: Cadabra Alpha 0.2 (Towards a Universal Syntax for Magical Processes)

Third example caused my parents-in-law to leave, declaring intention never to return.

Owe you a big drink.

Nominal

A: All
D: Cadabra Alpha 0.2 (Towards a Universal Syntax for Magical Processes)

Catastrophic misprint! Apologies to Aguel if my bad handwriting was at fault.

Third example, fifth line, third symbol should be + (sum) not × (product).

On no account attempt to work the example as printed.

The next version will have symbols more easily distinguishable.

[Note from distributor: Dendrite's writing was clear after all. Error all mine. Profuse sorries to all sheds and mothers-in-law involved.]

A: Nominal
D: Observations upon Toxicity Levels in the Efts of Native and Introduced Newt Species

I've long suspected the colony of cristatus near my home is atypical. Contact me through Aguel if you wish to visit them.

A: Along the Sand
D: Further Notes on Coastal Erosion

You really must start taking NLW, you know. Titration in that publication is taking a different line to the same question.

Dendrite

A: WearingSocks
D: You Said It Couldn't be Done (A Proof of Lachance's Last Theorem)

You've cracked it, old girl. This'll shut them up at Oberfussack.

A: Along the Sand

Beach party at my place, then?

Sinistral
